Fluid Flat Mop System
Putting microfibre at the heart of enhanced floor cleaning performance.

Oates® is an Australian company that has been supplying high quality, professional products to the cleaning industry for over 80 years. Renowned for its quality nation-wide warehousing services and distribution, Oates® now provides the ultimate floor maintenance solution, by utilising its existing wide range of cleaning products, in combination with new additions to the popular Oates/Decitex Fluid Flat Mop System.

Decitex, a French company at the heart of textile innovation, designs, develops and customises microfibre wiping textiles for professional use. As a premium manufacturer, Decitex delivers high performance textiles for mops and wipes that are easy and intuitive to use.

Decitex complements its textile expertise with a lightweight, innovative range of handles and mop heads. With their original design Decitex products allow textiles to become the prime cleaning agent, reducing our reliance on chemicals.

Oates® has formed a partnership with Decitex for the past two years to provide customers with a comprehensive range of Flat Mop products, combined with nation-wide service and support.

“Superior Water-Fed Mop Technology”

The Oates® / Decitex Fluid Flat Mop System comprises the Fluid Aluminium Flat Mop and a range of specially designed microfibre pads.

It is a completely integrated mopping system that provides for quick and effective cleaning without the need for a bucket or wringer and can be used with or without chemicals.

The Oates® / Decitex Fluid Flat Mop System has been designed for professional use to clean areas such as entry halls, common access areas, restaurants, classrooms, supermarkets and shops.

The System has also been designed for specialist applications such as healthcare, where rapid response and effective cleaning and disinfection are vital for a clean and safe environment.

- No bucket
- No wringer
- No chemicals*
- In-built reservoir

* Can be used with or without chemicals
To use the Fluid Flat Mop System begin by filling the reservoir in the handle with either water or chemicals. This can hold up to 500mls. Twist the locking sleeve to the unlock position and fill the handle with liquid using the 500ml Fluid Bottle. To ensure that water will not leak, lock the sleeve by twisting to the lock position.

Choose a suitable microfibre pad for the task at hand and connect it to the Fluid Glide Pad or directly to the aluminium flat mop head if you are using the Fluid Deluxe range of pads. The longer side of the aluminium head is the front of the flat mop and is the side from which the liquid is dispensed.

Pull the blue trigger upwards to dispense the liquid while mopping. Liquid will be diffused through 3 jets at the base of the handle. Use a figure 8 motion while mopping to effectively clean the area. As you mop continue to use the trigger to dispense the liquid as required.

- **Dimensions**: W397 x D77 x H1470mm

The Fluid Aluminium Flat Mop is an all in one concept. The handle has an in-built reservoir and holds 500mls of water or chemical. It is simple to use, lightweight and easy to manoeuvre. The angled aluminium head gets into corners and along skirting boards. The head has an ergonomic ball & socket joint that is easy to insert the handle and there is also a locking system on the ball and socket joint for vertical surfaces. There are multiple pads that easily connect to the velcro tabs on the head and these are easily changeable.

**Benefits**:
- All-in-one concept – Cleans up to 140m² in less time
- System reduces water and chemical usage
- Perfect match with Dispomop® and Dispomop® 3D – Ideal for cleaning stairs

**Industrial quality and strength**

- In-built reservoir with 500ml capacity
- 3 jets for easy diffusion of water/chemical
- Use with or without chemicals

Choose from a comprehensive range of microfibre mop pads to suit a variety of needs. Everything from general mopping and spill removal, right through to disposable pads for high risk areas like those found in operating theatres and the pharmaceutical industry.

Most of the Decitex Pads are colour coded that helps reduce the risk of cross contamination between different working areas. Colour coding products help ensure the right product is used to clean the right area to minimise the risk of bacteria transfer between cleaning zones and help improve hygiene levels.

- Blue - General Cleaning
- Green - Kitchen Areas
- Red - Bathroom Areas
- Yellow - Infectious Areas
- White - Operating Theatres
This microfibre pad is not only great for sweeping, cleaning and drying floors but it is excellent for absorbing spills. This pad can absorb up to 500mls of liquid with no need for a bucket or a press wringer. Therefore it is the ideal pad for use in busy public areas such as Restaurants, Cafes, Hotels, Shopping Centres and more where spills need to be cleaned quickly and effectively to ensure public safety and improve OH&S. All you need is this mop and you can clean the spill instantly, no need to fill a bucket with water as liquid is contained in the handle. This microfibre pad is reusable and can be washed and reused up to 300 times.

Using the DeLux range of pads on the Fluid Aluminium Flat Mop couldn’t be easier, safer or more effective.

Benefits:
- For mopping all kinds of floor surfaces
- Greater floor coverage, reducing mopping time and increasing productivity
- Reduced chemical usage

Specifications:
- Available colours: Blue, Green, Red, Yellow
- Construction: Outside: 100% polyester; Inside: 70% polyester / 30% polyamide; Velcro: polyamide
- Dry Weight: 260g
- Weight when wrung: 600g
- Absorption rate (water): 1 mop for 1/2 litre solution
- Finish: Sewing
- Number of washes: 300
- Washing temperature: Synthetic setting 60°C (withstands 95°C if required)
- Restrictions: No bleach / No softener
- Drying temperature: 60°C
- Saving: 1/3 of the normal dose of washing powder is enough

Fluid DeLux Range

4 in 1 - Sweep, clean, absorb, dry
Mop 100m² without a bucket
Pro-active microfibre velvet & 500mL absorbing multilayer
Press free wringing

Dimensions: W415 x D365mm (single pad)
This microfibre pad is reusable and can be washed and re-used up to 350 times. It is ideal for general mopping of smooth floor surfaces and is ideal for use in offices, hospitals, schools, restaurants, hotels etc.

With the V.M.P Technology the DX1 pad glides easily on floors and is highly efficient compared to the 80/20 microfibre mops. It has a high ability to trap dirt and with the polypropylene scrapers makes it easier to remove stubborn grime.

To use simply attach the DX1 pad directly to the bottom of the Fluid Aluminium Flat Mop head or Ergo Slider Flat Mop head.

Benefits:
- V.M.P Technology (Velvet Microfibre Polyester):
  - resistant to wear and chemicals
  - High percentage of microfibre
  - 30 sqm in pre-impregnation, up to 50sqm when used with the Fluid Aluminium Spray Handle
  - Lightweight and therefore cost efficient

This microfibre pad is reusable and can be washed and reused up to 50 times. It is ideal for general mopping of smooth floor surfaces and is ideal for use in offices, hospitals, schools, restaurants, hotels and more.

To use, ensure the Fluid Glide Pad is on the Fluid Aluminium Flat Mop and then place the Dispomop® 3D pad onto the Fluid Glide Pad, it will stick to it easily.

Benefits:

- 250 pads per 5kg washing load
- Approved for disinfection in compliance with the European standard EN13697
- More ecological washing system (saving water, the detergent, and laundry)
- Fits to all kinds of baseplate with Velcro fastening and a PAD (1 PAD provided with each box)
- Clean technology
- Reduced water and chemical usage

Specifications:

- **Construction**: Flat knit & polyether foam & fastening knit
- **Composition**: 100% polyester (70% microfibre)

**Dimensions:** W460 x D135mm (single pad)
This microfibre pad is a single use disposable pad, for damp mopping of smooth floor surfaces. It is ideal for use in high risk areas or controlled environments such as operating theatres or within the pharmaceutical industry. It eliminates the risks of contamination and can be used as an emergency alternative.

To use, ensure the Fluid Glide Pad is on the Fluid Aluminium Flat Mop and then place the Dispomop® pad onto the Fluid Glide Pad, it will stick to it easily.

Benefits:
- Approved for disinfection in compliance with the European standard EN13697
- Fits to all kinds of baseplate with Velcro fastening and a PAD (1 PAD provided with each box)
- Prize winning product at the Europropre trade fair

Specifications
- Available colours: White
- Construction: Flat knit
- Composition: 100% polyester (70% microfibre)
- Weight per m²: 180g
- Dry Weight: 10g
- Weight when wrung: 26g
- Absorption rate (water): 450% impregnation = 11 Dispomop® for 1/2 litre solution
- Finish: Ultrasonic cutting
- Yarn size: 0.56 dTex
- Number of washes: Disposable

Fluid Dispomop® Range
Disposable microfibre pad
Eliminates risks of contamination, low particle release
Single use, multiple benefits
Emergency alternative

Use in conjunction with Fluid Glide Pad

In addition to the Fluid Aluminium Flat Mop and the microfibre pad range, there are some other accessories required. These include the Fluid Glide Pad & the Fluid bottle.

The Fluid Glide Pad is a cushioned pad which fits to the base plate with a Velcro fastening and is used in conjunction with the Dispomop®, Dispomop 3D® and Dry Dispomop® range of pads. The white side of the pad connects to the Velcro on the baseplate and the black side of the pad is used to connect the microfibre pad range mentioned previously.

The 500mL Fluid bottle can be filled with either water or chemical solution for ease of pouring into the Fluid Aluminium Spray Handle.
